PROFESSIONAL SUMMARY

- Analytical Full Stack Developer and Computer Science graduate with hands-on experience in full stack web development using Node.js, Express.js, ASP.NET Core, and Next.js. Proficient in database management across SQL and NoSQL databases, building RESTful web services, securing web applications, and designing responsive front end technologies following clean layered architecture.

TECHNICAL SKILLS

Web Technologies & Front End Technologies

- Next.js, React.js, Node.js, Express.js, ASP.NET Core MVC, Web API, HTML, HTML5, CSS, CSS3, Tailwind CSS, Bootstrap

Programming Languages & Back End

- C#, JavaScript, TypeScript, C++, PL/SQL, .NET Core

Database Management & NoSQL

- MongoDB (Mongoose), SQL Server, Entity Framework Core, Prisma, SQL, NoSQL

Tools & Version Control

- Socket.io, Git, GitHub, Postman, Cloudinary, Vercel, Render, Vite

Concepts & Security

- RESTful web services, JWT, Role-Based Access Control, OOP, Rate Limiting, Route Protection, Clean Architecture, Problem Solving

PROJECTS

Aoun — Community Item Donation Platform 🔗

Full-Stack Developer | Next.js, TypeScript, Node.js, Express, MongoDB, Socket.io | Vercel & Render

- Architected and deployed a full-stack donation platform connecting 100+ active users across structured donation workflows, item lifecycle tracking, and Safe Hub pickup management.
- Integrated real-time bidirectional communication via Socket.io to support sub-100ms live in-app messaging, donation request coordination, and instant event notifications.
- Engineered a secure double-confirmation handover flow and a concurrency-safe booking engine using atomic MongoDB operations to eliminate 100% of race conditions.
- Applied a clean Layered Architecture (Controllers, Services, Repositories, DTOs) on the backend and Next.js App Router with custom route-protection proxy logic on the frontend, reducing data retrieval latency by ~20%.
- Built comprehensive admin moderation tools, reporting pipelines handling multiple daily logs, configurable system settings, and user reputation scoring with interactive leaderboards. • (Live Demo): <https://aoun-project-theta.vercel.app> 🔗

UniEvents (University Event Booking System)

Back-End Developer | ASP.NET Core MVC | C# | SQL Server

- Collaborated within a cross-functional team to develop a secure backend for university event booking using ASP.NET Core MVC and C#, improving response time by ~15% via query optimization and middleware tuning.
- Modeled and structured relational database schemas using Entity Framework Core to maintain data integrity across complex many-to-many booking relationships.
- Configured JWT-based authentication and role-based access controls (Student, Organizer, Admin) to secure event management workflows.

PROFESSIONAL EXPERIENCE

Full-Stack Web Development Trainee (MERN Stack)

01/2026 – 04/2026 | Amman, Jordan

DOT Jordan

- Completed an intensive 130-hour Full-Stack Web Development bootcamp covering advanced MERN stack engineering.
- Built responsive, mobile-first interfaces with Tailwind CSS, increasing user engagement metrics by ~25%.
- Connected RESTful APIs and tuned high-read MongoDB queries to streamline client-server data flow and meet 100% of sprint deadlines.

EDUCATION

Bachelor of Science in Computer Science (Graduated)

2022 – 2026 | Amman, Jordan

Al-Zaytoonah University of Jordan

COURSES & CERTIFICATIONS

- Software Engineering & Database Foundations (12 Professional Courses) — Programming Advice Platform by Mohammed Abu-Hadhoud
- Full-Stack Web Development Bootcamp (MERN Stack) — DOT Jordan (130 Hours)
