PROFESSIONAL SUMMARY

Computer Science graduate and Junior Software Developer with hands-on experience building and deploying full-stack web applications across JavaScript/TypeScript and .NET ecosystems. Experienced with React, Next.js, Node.js, ASP.NET Core, REST APIs, SQL Server, and MongoDB. Built Aoun, a deployed full-stack platform featuring secure authentication, role-based access control, real-time communication, and multi-step business workflows.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, C#, SQL, C++
Frontend	React.js, Next.js, Tailwind CSS, HTML, CSS, Bootstrap
Backend	Node.js, Express.js, ASP.NET Core MVC, REST APIs, Socket.IO
Databases & ORM	MongoDB, Mongoose, SQL Server, Entity Framework Core, Prisma
Tools & Deployment	Git, GitHub, Postman, Vercel, Render
Concepts	Authentication, JWT, RBAC, Rate Limiting, RESTful APIs, Layered Architecture, DTOs

PROJECTS

Aoun - Full-Stack Donation Platform

Full-Stack Developer | Next.js, TypeScript, Node.js, Express.js, MongoDB, Socket.IO

- Built and deployed a full-stack donation platform supporting booking/waitlists, requests/offers, safe-hub coordination, handover, ratings, and multi-role workflows.
- Implemented JWT auth with refresh-token rotation, reuse detection, hashed OTP, RBAC, and Redis-backed rate limiting with secure httpOnly cookies.
- Developed real-time chat and notifications with Socket.IO, plus background jobs for booking expiry, waitlist promotion, reminders, and automatic quota/request lifecycle handling.
- Built admin moderation for user reports and appeals, audit logs, dynamic system settings, trust management, and configurable platform policies.
- Structured the backend with controllers/services/repositories/DTOs and atomic DB operations; added automated tests with Playwright E2E and GitHub Actions CI.

UniEvents - University Event Management & Booking System

Back-End Developer | ASP.NET Core MVC, C#, SQL Server, Entity Framework Core

- Developed an event booking system with session-based authentication, BCrypt password hashing, and role-based access for Student and Admin workflows.
- Implemented capacity-aware booking with an automated FIFO waitlist that promotes students when seats become available.
- Built booking and attendance workflows including cancellations, check-in verification, PDF ticket generation, admin analytics, and Excel booking exports.

EXPERIENCE & TRAINING

Full-Stack Web Development Trainee - MERN Stack | Jan 2026 - Apr 2026 | Amman, Jordan

DOT Jordan

- Completed a 130-hour hands-on MERN-stack training program covering React, Node.js, Express.js, MongoDB, REST APIs, and responsive web development.

EDUCATION

Bachelor of Science in Computer Science | 2022 - 2026 | Amman, Jordan

Al-Zaytoonah University of Jordan

ADDITIONAL TRAINING

- Software Engineering & Database Foundations - Programming Advices Platform by Mohammed Abu-Hadhoud (12 courses).
