PROFESSIONAL SUMMARY

- Detail-oriented Full-Stack Developer and Computer Science senior with hands-on experience building and deploying production-grade web applications. Proven ability to design scalable architectures using the MERN stack and ASP.NET Core, with a strong focus on security, clean code, and real-world problem solving.
- Adept at working across the full stack – from database schema design and RESTful API development to responsive frontend interfaces – with practical experience developed end-to-end full-stack web applications.

TECHNICAL SKILLS

Web Technologies & Frameworks

- Next.js, React.js, Node.js, Express.js, ASP.NET Core MVC, Web API, Tailwind CSS, Bootstrap, HTML5, CSS3.

Programming Languages

- JavaScript, TypeScript, C#, C++, PL/SQL

Databases

- MongoDB, SQL Server, Entity Framework Core

Tools & Version Control

- Git, GitHub, Vite, Vercel, Render, Postman, Prisma, Cloudinary, Socket.io

Concepts

- RESTful APIs, JWT Authentication, OOP, Rate Limiting, Clean / Layered Architecture

PROJECTS

Aoun – Community Item Donation Platform

Full-Stack Developer | MERN Stack & Next.js 14 | Vercel & Render

- Architected and deployed a full-stack donation platform serving a two-sided marketplace for donors and recipients, with tailored access flows for both university students and the general public.
- Implemented robust verification and trust controls including university email domain checks, WhatsApp OTP (Meta Business API), and a progressive trust score with automated badges to reduce fake sign-ups and encourage positive behavior.
- Built a concurrency-safe waitlist and booking engine using atomic MongoDB findOneAndUpdate operations, eliminating race conditions and enforcing fair monthly quotas per user.
- Applied a clean Controller–Service–Repository architecture with DTOs, paginated and filterable APIs, and Cloudinary media handling to improve backend structure and reduce data retrieval latency by ~20%.

UniEvents (University Event Booking System)

Back-End Developer | ASP.NET Core MVC | C# | SQL Server

- Collaborated within a cross-functional team to develop a secure backend for university event booking using ASP.NET Core MVC and C#, improving response time by ~15% via query optimization and middleware tuning.
- Modeled and implemented relational database schemas with Entity Framework Core to maintain data integrity across complex many-to-many booking relationships.
- Implemented JWT-based authentication and role-based authorization (Student, Organizer, Admin) to secure event management workflows.

EXPERIENCE & TRAINING

Full-Stack Web Development Trainee (MERN Stack)

12/2025 – 02/2026

- Built and deployed full-stack web applications using the MERN stack in a production-like training environment.
- Built responsive, mobile-first interfaces with Tailwind CSS, increasing user engagement metrics by ~25%.
- Integrated RESTful APIs and optimized MongoDB queries for high-read collections to streamline client-server data flow and meet 100% of assigned feature deadlines.

Amman, Jordan

EDUCATION

Bachelor of Computer Science

2022 – 2026

Al-Zaytouna University, Jordan

COURSES & CERTIFICATIONS

Completed 12 professional courses through the Programming Advice platform by Abu Hadhoud.
