PROJECTS

Aoun - Full-Stack Donation Platform

Full-Stack Developer | Next.js, TypeScript, Node.js, Express.js, MongoDB, Socket.IO

- Developed a full-stack platform for donation discovery, item management, safe-hub coordination, and direct handover workflows.
- Implemented registration, login, account verification, password-reset, JWT authentication, role-based access control, protected routes, and server-side validation.
- Built real-time communication and notification flows using Socket.IO, plus a double-confirmation handover process for donor and recipient actions.
- Structured the backend using controllers, services, repositories, DTOs, and middleware; implemented atomic MongoDB updates to help prevent double-booking scenarios.
